## MY PROFILE

My name is Giovanni, Frontend developer since 2013. I have worked in the area of design and IT achieving optimum results for companies, agencies, startups and entrepreneurs. I like functional aesthetics, the usability applied research project based. As a professional I like the teamwork, since I have worked in different scalable projects.

I am in constant learning in UX / UI area, also about language JavaScript; its new features and Framework for development.

## EXPERIENCE

### FRONTEND DEVELOPER AT SIEMENS

September 2023 - September 2023 - November 2023 - Mining Company

#### RESPONSIBILITIES

- Improved the user experience (UX/UI) through thoughtful analysis and implementation of improvements.
- Collaborated with the backend team to seamlessly integrate various endpoints into the frontend.
- I developed new features leveraging the user's time zone settings for a personalized experience.
- I implemented advanced filtering and sorting options for tables, improving data exploration.
- I used analytics capabilities to optimize the layout for responsive design.
- I created Docker containers and images with Docker Compose for efficient application updates.
- I managed tasks effectively using Azure for efficient project organization.
- I used Scrum methodology for efficient coordination within the team.
- Proficient in Vue.js 3 framework, using the compose API for scalable frontend development.

#### KEY ACHIEVEMENTS

- I added timezone functionality to the application using Vue's global state manager called Pinia.
- I improved and corrected the charts using the Apex Charts library for user-generated signals and anomalies in the reports.
- Continued improvements to the usability of the application.
